

Rev 1.2 Feb 2020 For Internal Use Only, DO NOT Distribute

Ordering Configurator

Series: The Series 2520 Trace Oxygen Analyzer is a portable, battery operated percent oxygen analyzer. The enclosure is made from durable polycarbonate and is rated NEMA 1 for general purpose service. The instrument is powered from rechargeable NICAD batteries that are mounted internal to the analyzer. Recharging of the batteries is accomplished using a built-in battery charger with a universal AC adapter.

Select options below:
